

# MANGO CROP REPORT

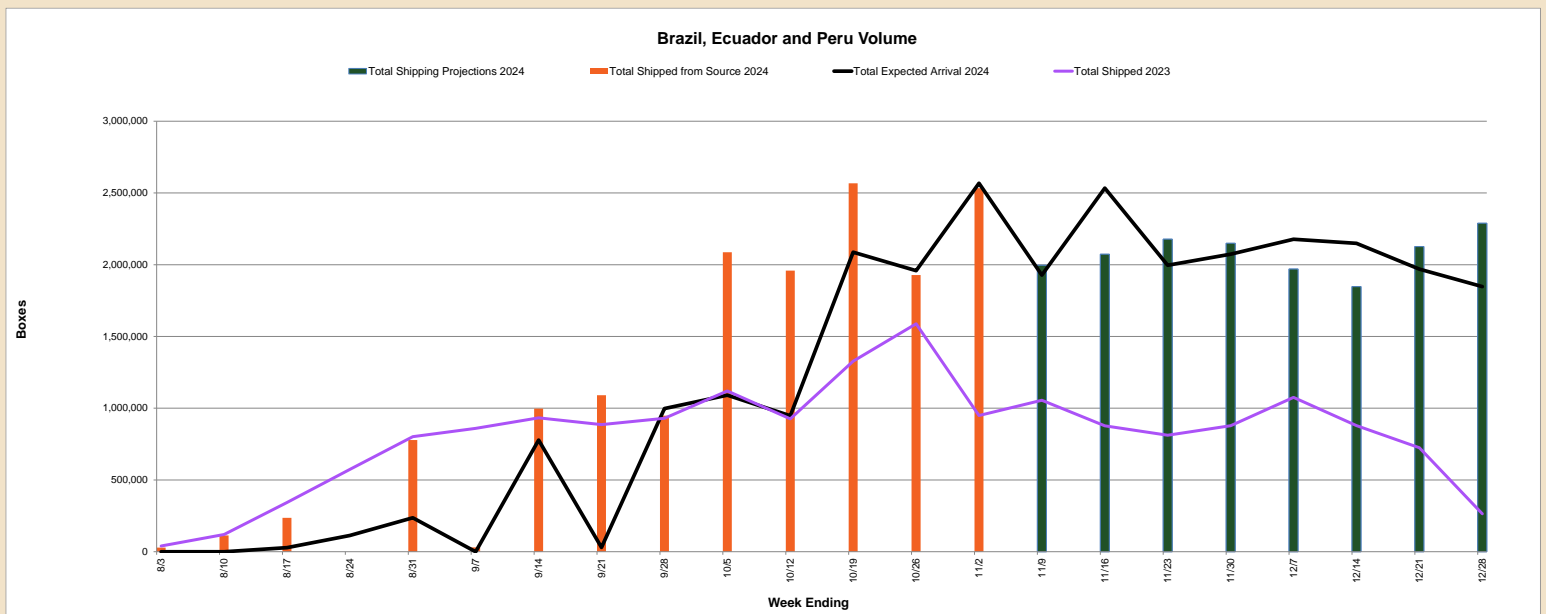

## Updated November 7<sup>th</sup>, 2024

Please refresh your browser to upload the most current report

The National Mango Board (NMB) publishes the Mango Crop Report on a regular basis using information from industry organizations and other sources in an effort to provide the best available information on shipment projections, actual arrivals, variety and size availability, and other figures considered useful to the U.S. mango market. Although this information is updated regularly, changes can occur due to numerous factors at any given moment in time. Accordingly, the Mango Crop Report should only be used as a guide.

### SUMMARY: Brazil, Ecuador and Peru

- ◆ **EXPORTING REGIONS:** Brazil is currently harvesting and/or packing. Ecuador is currently harvesting and/or packing. Peru is currently harvesting and/or packing. See pages 3-5, 6-8 and 9-11, respectively for more details.
- ◆ **VARIETIES:** There is currently ONE main mango variety shipped to the US market: Tommy Atkins (72%). There are also limited supply of Ataulfo/Honey, Keitt, Kent, Haden, Palmer, Nam Doc Mai, Edward and Naomi. See page 2.
- ◆ **SIZING:** (Ataulfo/Honey: Large = size 16 and larger, Small = size 18 and smaller. Round mangos: Extra Large = 7 and larger, Large = sizes 8 and 10, Small = 12 and smaller.)
- ◆ **RECENT VOLUMES:** Total mango volume shipped on week ending 11/02/2024 was approximately 2,533,441 boxes.
  - ◇ **Brazil:** Volume shipped was approximately 617,851 boxes for a total of 6,828,089 boxes for the season.
  - ◇ **Ecuador:** Volume shipped was approximately 1,858,238 boxes for a total of 8,322,080 boxes for the season.
  - ◇ **Peru:** Volume shipped was approximately 57,352 boxes for a total of 147,170 boxes for the season.
- ◆ **FUTURE VOLUMES:** Overall mango volume shipped from week 45 (11/09/2024) to week 50 (12/14/2024) is expected to be about 119% higher YOY, with arrivals expected from week 46 to 51. The 2024 Brazilian season is expected to be about 37% lower YOY. The 2024 Ecuadorian season is expected to be about 125% higher than 2023 and 6% higher than 2022. The 2024 Peruvian season is expected to be about 288% higher than 2023 and 6% higher than 2022.

**Please note:** U.S. entry ports report incoming volume on different schedules; some report daily and some weekly. This causes discrepancies between the volume shipped from the source and the volume arrived at the U.S. entry ports in any given week.

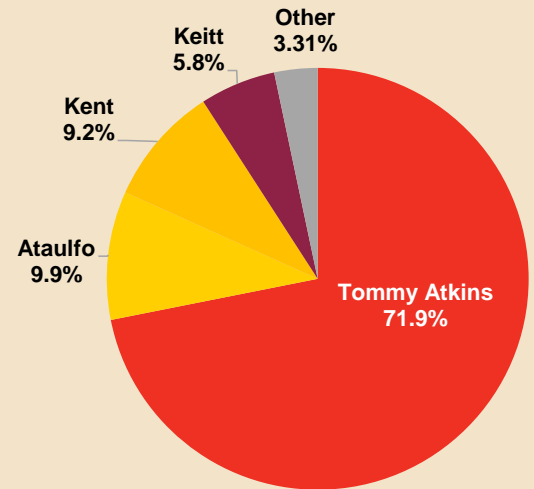

Projections are adjusted throughout the season as new information is received.

# Crop Report Tools and Resources

The Mango Crop Report is updated weekly and can be found at [mango.org/crop](https://mango.org/crop)

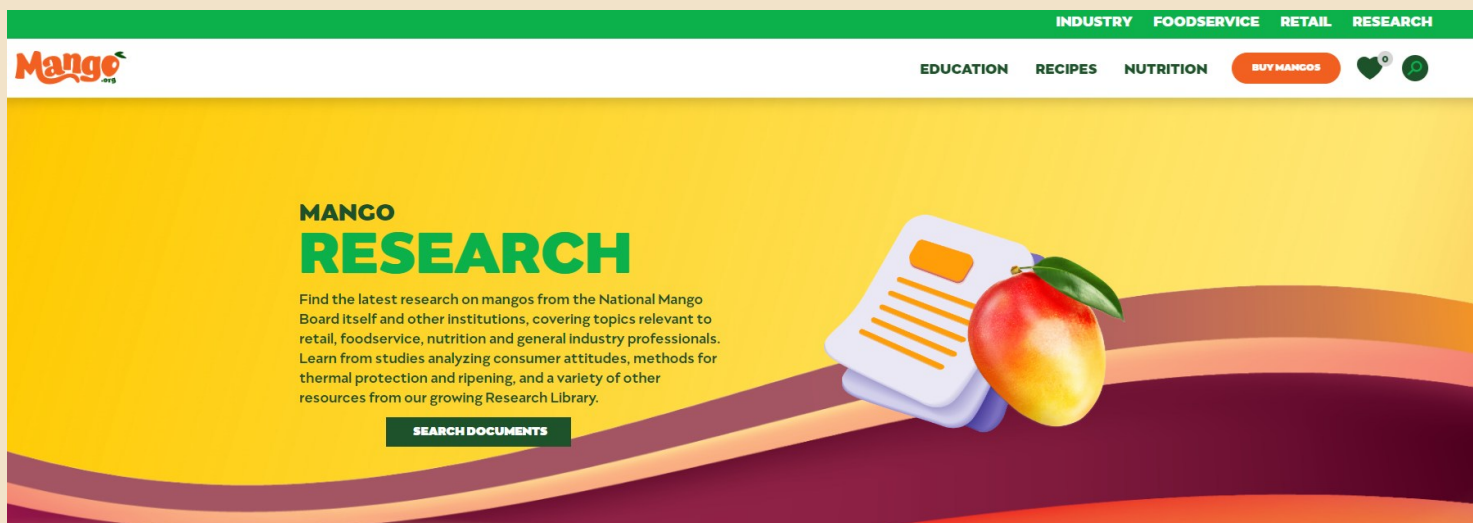

Note: the National Mango Board is working with organizations in the mango-producing countries to get projections of what will be shipped to the U.S. This document contains information from countries that are currently shipping or planning to ship in the near future to the U.S. and does not represent the entire year. The crop report document will be updated as we receive new information from each country. Other valuable tools include (these are links):

[Three-Year Trend by Country & Month](#)

[Mango Crop Report Application](#)

[Mango Food Safety](#)

[Mango Sustainability](#)

The screenshot shows the top navigation bar of the Mango website with categories: INDUSTRY, FOODSERVICE, RETAIL, RESEARCH, EDUCATION, RECIPES, NUTRITION, and a red button for BUY MANGOS. The main banner features the Mango logo, the heading 'MANGO RESEARCH', and a sub-heading 'Find the latest research on mangos from the National Mango Board itself and other institutions, covering topics relevant to retail, foodservice, nutrition and general industry professionals. Learn from studies analyzing consumer attitudes, methods for thermal protection and ripening, and a variety of other resources from our growing Research Library.' Below the text is a 'SEARCH DOCUMENTS' button. To the right is an illustration of a mango and a document.

## WEBINARS

Listen In as we discuss strategies for fresh-cut mango preservation, maximizing yield, increasing water-use efficiency and more for the optimal growth of mangos.
